

Assignment 3

Statistical Analysis

The marks obtained by 10 students in a mathematics test are as follows:

45, 50, 55, 50, 60, 65, 70, 50, 75, 80

- Find the mean of the given data.
- Determine the median of the marks.
- Identify the mode of the given dataset.
- Compute the range of data.
- Find the inter-quartile range
- Calculate the standard deviation of the dataset.
- Draw a box plot for the given data.
