

Assignment 2

Pivot Table

Using the dataset provided in Excel, answer the following questions by creating a Pivot Table in Excel:

1. Total Sales & Profit by Region

- Create a Pivot Table that sums up the total Sales (\$) and Profit (\$) for each Region (North, South, East, West).
- Which region has the highest total sales?

2. Sales by Product Category

- Display the total Sales (\$) for each Product category.
- Which product has the highest sales?

3. Monthly Performance Analysis

- Group the Date of Sale by Month and check total Sales (\$) and Profit (\$).
- Which month had the highest total sales?

4. Customer Segment Insights

- Analyze Sales (\$) and Profit (\$) by Customer Segment (Enterprise, Individual, Small Business).
- Which customer segment contributes the most profit?

5. Shipping Delay Analysis

- Create a calculated field to determine the Shipping Delay (Days) using:
$$\text{Shipping Delay} = \text{Date of Shipping} - \text{Date of Sale}$$
- Find the average shipping delay per region.
- Which region has the longest average shipping delay?
