

Faculty of Engineering & Technology
Gurukul Kangri University , Haridwar
First Sessional Exam (2024-25)
Embedded System
BET-C610

Time : 1 Hr.

M.M: 20

Section A : Attempt any Two question. Each question carry 5 marks.

Question : 1 Discuss the differences and similarities between Embedded system and Computer system.

Question : 2 What do you mean by Real Time Operation System (RTOS). How RTOS plays an important role in designing an Embedded System.

Question : 3 Define the following

- (a) Tri state Buffer
- (b) Watch Dog Timer

Section B : Attempt any one question. Each question carry 10 marks.

Question: 1 Discuss in detail the Design Life Cycle of an Embedded System.

Question : 2 How can you define the hardware and software partitioning and co-designing for an embedded system.

Faculty of Engineering & Technology
Gurukul Kangri Deemed to be University, Haridwar
Second Sessional Exam
Subject: - Embedded System (ECE & CSE)
Paper Code: - BET-C610

Note : Attempt any Two questions from Section A , and any one question from Section B

Section -A

- ~~Q.1~~ Discuss the Differences Between general purpose and single purpose processors.
- ~~Q.2~~ What do you mean by FSM how it is different from FSMD.
- ~~Q.3~~ Discuss DSP Chip Processor in Short.
- ~~Q.4~~ How can you Differentiate between State Diagram and ASM Chart representation of FSM.

Section -B

- Q.1 Designing a processor to compute the **Least Common Multiple (LCM)** of three numbers.
- ~~Q.2~~ Design a processor to compute the GCD of two numbers.
