

Course Code: BCE-C661
Course Name: DISTRIBUTED SYSTEMS LAB

MM: 50 Time: 3 Hr. L T P 0 0 2	Sessional: 15 ESE: 35 Credit: 01
---	---

Objectives:	- To understand the fundamentals of distributed systems. - To understand implementation of mutual exclusion, different clock, locking algorithm. - To implement Remote Procedure Call, chat server, Remote Method Invocation and termination detection algorithms.
--------------------	--

NOTE:	- Minimum of 5 experiments have to be conducted. - In practical examination the student shall be required to perform one experiment. - A teacher shall be assigned 20 students for daily practical work in the laboratory. - No batch for practical class shall consist of more than 20 students. - The number of students in a batch allotted to an examiner for practical examination shall not exceed 20 students. - Addition/deletion in above list may be made in accordance with the facilities available with the approval of H.O.D./Dean.
--------------	--

LIST OF EXPERIMENTS	No. of Hours	POs mapped	PSOs mapped
- Program to implement non token based algorithm for Mutual Exclusion - Program to implement Lamport's Logical Clock - Program to implement edge chasing distributed deadlock detection algorithm. - Program to implement locking algorithm. - Program to implement Remote Method Invocation. - Program to implement Remote Procedure Call. - Program to implement Chat Server. - Program to implement termination detection	03	PO1/ PO2/ PO3/ PO4	PSO1/ PSO2

Learning Outcomes:	- To understand and learn fundamentals of mutual exclusion in distributed systems. - Apply and understand implementation of Lamport's clock, deadlock detection and different locking algorithm. - Identify and implement concept of Remote Procedure Call, Remote Method Invocation and termination detection algorithms.
---------------------------	--

CO-PO/PSO MAPPING
